Attention: Professor Kakehi

Gentlemen:

This letter of agreement will establish the guidelines for the use of the ACM/IEEE Computer Society Model Curriculum in updating the IPSJ curricula and publishing it for the Japan market.

The Institute of Electrical and Electronics Engineers, through its IEEE Computer Society (IEEE CS), located in Washington, DC, holds the copyright to the IEEE/ACM Computing Curricula 2001: Computer Science volume (Model Curricula), which was developed in partnership with the Association of Computing Machinery (ACM), located in New York, New York.

The Information Processing Society of Japan (IPSJ), located in Tokyo, Japan, wishes to use the IEEE/ACM Computing Curricula 2001: Computer Science volume to update its curricula, which will be published for the Japan market.

The IEEE CS agrees to grant IPSJ permission to use the Model Curricula to update its curricula, with the following provisions:

1. IPSJ agrees to keep both the IEEE CS and the ACM informed regarding the status and results of this project and to notify both parties regarding the manner in which the Model Curricula is to be used.
2. Permission is granted for publishing in Japanese in the Japan market only.
3. When using the Model Curricula as a reference, IPSJ agrees to include acknowledgement of the Model Curricula as a source document in all publications of the IPSJ curricula.
4. When using sections of the Model Curricula, in whole or in part, IPSJ agrees to include the copyright notice located within the Model Curricula.
5. IPSJ is aware that additional volumes of the Model Curricula have been published and should be considered as potential reference material. The

volumes include Software Engineering, Computer Engineering,
Information Systems and an Overview volume.

6. IPSJ should be aware that the IEEE/ACM Computing Curricula 2001:
Computer Science volume will undergo a review and update in 2007.

The IEEE Computer Society and the Association of Computing Machinery are
happy to grant the Information Processing Society of Japan permission to use
the Model Curriculum in their efforts to update the IPSJ curricula.

Agreed to on 12 December 2006:

Dr. Murali Varanasi
Vice President for Educational Activities
IEEE Computer Society

Ms. Patricia Ryan
Deputy Executive Director and Chief Operating Officer

Dear Dr. Varanasi and Ms. Ryan:

The Information Processing Society of Japan deeply expresses gratitude for your permission on the use of the ACM/IEEE Computer Society Model Curriculum under the conditions described in the letter to IPSJ dated 12 December 2006.

The model curriculum will be very helpful for the update and we believe we can make useful IPSJ curricula.

Very truly yours,

Hideyuki Nakashima
Vice President for Research and Educational Activities
Information Processing Society of Japan (IPSJ)

CC: Katsuhiko Kakehi
